

First you change the background to #0000cc. Then for the snow balls use #ccffff, make sure all of them are the same size. Put them right on top of each of each other in the middle of the bottom. Make sure the snowman snowballs comes to the top of the page. For the eyes put a dot but make sure the color is #000000 and the pencil is on 15, then make three short lines coming out of the eyeballs. Use #ff3300 for the nose and make it a triangle. Use #ff33ff for the mouth and make it straight on the top and curved on the bottom (just lines, no circles). After that for the buttons go to the star stamps and make the inside orange and the outline green. Then make them going up and down in the middle of the middle snowball. For the arms make the color #660000, then make two straight lines going straight out of the middle snowball on each side. Then make two lines going out of each of the straight lines. Then for the snowflakes have the stamp on star and have the color on #ccffff. Then draw them all around the snowman.
